

ANTO SAM CHRIST A

+91-8870618248 | antosamchrist18@gmail.com | Karaikal
antosamchrist | AntoSam18

I'm passionate about AI, Data Science, and Agentic AI, with hands-on experience building intelligent, data driven solutions. I enjoy working with ML models, AI agents, automation, and turning complex problems into practical solutions. My focus is on building scalable and impactful AI systems that improve processes and decision making. Beyond tech, I'm an avid speaker and communicator who enjoys sharing ideas and working with teams.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Manakula Vinayagar Institute of Technology	2022-2026 CGPA:9.15
Higher Secondary School Certificate [HSC] ONGC Public School	2022 Percentage:83.6%
Secondary School Leaving Certificate [SSLC] Vidyodaya High School	2020 Percentage: 89%

SKILLS

Languages : Python, Html5, CSS3, and Sql.
Frameworks: Flask, Fast API, React.js
Libraries: TensorFlow, Scikit Learn, Shap, Pytorch, Scapy, GradCAM
AI &Agentic AI :LangChain, LangGraph, MCP, RAG, N8N
Tools: Tableau, Figma and GNS3.
Databases:Mongodb, Neo4j.
Soft Skills: Leadership, Communication, Adaptability and Collaboration

PROJECTS

Trinetra-An Agentic Multimodal deepfake and Temporal Influence Intelligence System |*Python, Langraph,N8N.*
Role: Team Leader | Agent & Backend Developer

Engineered a real-time deepfake detection system across video, audio, and text, incorporating narrative-tracking to monitor online misinformation propagation. Integrated n8n automation to generate AI-driven media verifications that function as an early warning intelligence framework.

Deep Learning based Opportunistic Osteoporosis Screening | *Python, Tensorflow , Custom CNN , Pytorch.*
Role: Team Leader | Deep Learning Model Developer

Spearheaded an ensemble deep learning pipeline (custom CNN + fine-tuned Inception) that classifies knee X-rays into three bone density categories with 94% accuracy.

AI Powered Legal Document Analysis and Autonomous Contract Drafting System | Python, PyTorch,(BERT), FastAPI.
Role:Developer

Contributed to an AI-powered legal document analyzer by developing modules for risk analysis, insight extraction, knowledge graph generation, and autonomous contract drafting.

AI Driven Customer Attrition System using Stacking Ensemble and L.I.M.E | Python, Flask ,L.I.M.E,RF,XGB, LGBM.

Developed a stacking ensemble model combining Random Forest, XGBoost, and LightGBM with Logistic Regression as a meta learner to predict customer attrition (ROC AUC: 0.9367). Integrated LIME for explainability and deployed the model via Flask web app.

CERTIFICATIONS

Python for Data Science-NPTEL Swayam

Learned fundamental Data science concepts and ML algorithms like regression and clustering.

The Data Science Course – 365 Careers

Gained expertise in data preprocessing, data cleaning, and working with NumPy & Pandas and ML algorithms

Machine Learning- Internshala Trainings & IIT Madras Pravartak

Learned Fundamental ML algorithms like regression, clustering, logistic regression and SVM.

Prompt Engineering for AI – Udemy

Learned prompt optimization techniques to enhance AI decision-making and response accuracy.

ACHIEVEMENTS

Prefinalist-Unisys Innovation Program Season 16&17 (May 2025 & June 2026)

Led a project team to a Top 10 national ranking as a team leader while qualifying as a prefinalist across Seasons 16 & 17 of the Unisys Innovation Program.

Regional Finalist -ICT Youth Talk Tamilnadu (Oct 2024)

Regional Finalist of Puducherry at ICT YouthTalk Tamilnadu

Winner-Front End Fusion Fest 2.0 (July 2024)

Led a team in developing Style Sphere , a magazine -themed webpage using CSS,JavaScript, and HTML

First Prize-Paper Presentation (Sep 2023)

Presented a paper on "Development of Digital Trust Using Quantum Computing" at Versio'23, organized by SRM Institute of Science and Technology, Ramapuram, and secured First Prize.

LEADERSHIP & EXTRA CURRICULAR ACTIVITIES

Core Member – Department of Computer Science Student Association, MVIT

Contributed to planning and execution of the technical and non-technical events within the department.

Lead Organizer – CASTILO 25

Spearheaded MVIT's first-ever 24-hour hackathon, CASTILO 25, held in February 2025. The event attracted 400+ participants, featured 15+ problem statements across 7 tracks, and was praised for its execution and engagement.

Co-Organizer - CAPTCHA (Annual Department Symposium)

Co-managed the department's flagship annual symposium for two consecutive years, overseeing technical operations, event coordination, and live hosting across multiple tracks.

INTERNSHIPS

Content Writing Intern at Earth 5R
Machine Learning Internship at VEI Technologies(AICTE)

Jan 2025-June2025
February 2025

AREA OF INTERESTS

- Data Science
- Agentic AI
- Explainable AI(XAI)

LANGUAGES KNOWN

Tamil (Native Proficiency)
English (Bilingual Proficiency)
Hindi (Full Professional Proficiency)
German (Limited Working Proficiency)
